Notes from you to us _____

Did a shop refer you to us? which one: _____

Please draw all known damaged areas (we live for details)

Ram-air foil type kite. Certainly this diagram won't match your kite exactly so simply indicate regions. Also help us by looking inside your kite for hidden damage to ribs.

Yes, some of the bridles on this kite are damaged. Please repair the tangled mess.

I sent this kite with its bag. (not always needed but it is up to you)

The kite was not packed using styrofoam peanuts because they are not needed.

What this ticket does: This ticket is to help us get your kite completely healed. The more you can tell us about the damage, the better. It is also our way to contact you and will hang around in our studio faithfully with your kite until we are done with the repair. Then it helps create your invoice and finally gets dropped in a box to go down in history as the weight of other tickets pile on top of it. You can give us special instructions draw funny pictures and write stuff for us to chuckle at if you like. Also please know that we also do our best to check your kite completely regardless of what you indicate on this ticket.
